## Summary

I'm making the world better by building high-fidelity web interfaces, which are equally friendly for customers, developers and search engines. I have a passion for web standards and keep abreast of new developments in the industry, interested in how the latest things and the smartest companies work.

## Experience

### **Front-end Developer Intern**

**Liga A**

Sept 2022 – Present

- Build, maintain and improve responsive, cross-browser compatible web pages using web development best practices with a key focus on accessibility and performance.
- Deliver reusable, single-responsible components which can be used across multiple projects.
- Use the latest incarnations of HTML & CSS & JavaScript with attention to the limitations that developing for a broad audience can bring.
- Integrate external APIs and JavaScript libraries.
- Ensure a customer journey consistent across all platforms, and enjoyable with a wide range of devices and browsers.
- Optimize websites for maximum speed, handle code review, testing and bug fixes.
- Collaborate and communicate effectively within the front-end team and across the organization to achieve the team's goals.
